Intuition, Innovation and Originality

These are the characteristics that drive our work and projects.

We want to be a benchmark in the world of
aluminium shutters, especially in terms of innovation
and originality in order to enable the market to always
have cutting edge products.

This catalogue will guide you in choosing our products through a general overview, or showcase, of what we offer. You can learn more about the features of a specific model by requesting the catalogue of the collection from your retailer or reference agent. All of our catalogues are available in the dedicated section on our website.

Company

We are an industry specialising in the design, production and marketing of shutters and shutters in aluminium, with a focus on design and the safety of the end user.

Mission

The shapes of our models come from the history and demand of the Italian territory and differ thanks to technological innovation, robustness, durability, and attention to detail.

Aluminium

The structure of our shutters and blinds is made from extruded aluminium in EN AW6060 alloy according to UNI EN9006/1 produced in partner drawing mills. We have chosen to use aluminium for its strength, lightness and resistance to corrosion. It requires no maintenance and is highly recyclable.

Colours

Painting is done with polyester powders baked onto the aluminium surface according to Qualicoat and Qualideco standards or internationally recognized product certifications related to painted aluminium. More than 2,000 RAL colours available in gloss, semi-matte and matte finishes, to which are added new rough colours. Over 300 finishes are achievable in wood effects. Accessories and hardware are predominantly aluminium.

Eco-Friendly

We care about the environment, so we use sophisticated energy-efficient work centres which pay close attention to the materials used in the processing of products and their packaging.

Certifications

Punto Persiane sees certifications as an important value not only as a recognition of the products' strength, but especially as a completely trustworthy relationship with customers.

Materials undergo thorough production and laboratory checks, while processing and assembly are in compliance with the specifications for obtaining the CE mark. We guarantee a reliable, durable and certified product thanks to monitoring the raw materials used, verifying the various stages of processing and assembly, the continuous testing of the products and the laboratory certificates obtained.

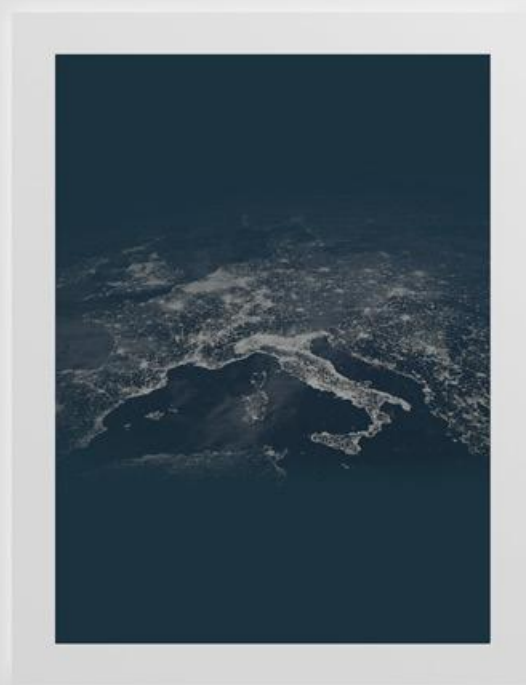

Collection Infinita

Series 45/52

As Infinita as its possibilities for application, this collection encompasses the widest range of models of shutters and blinds that can be installed both in Italy and abroad.

The models feature the sash with a variable thickness from 45 and 52 mm and are accompanied by 11 types of frame perimeter of different shapes and sizes.

16 Slatted shutters

● Round fixed
slat shutters

Angela

50 mm ovaline

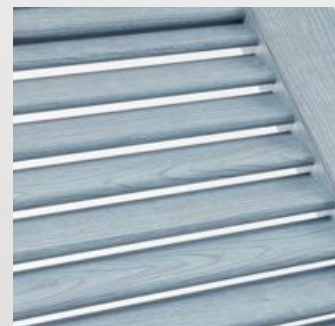

Shutter with fixed open 50 mm round slats in slanted position, separated by special reinforced nylon spacers.

Giulia

50 mm ovaline

Shutter with 50 mm open fixed round slats in slanted position, separated by special aluminium spacers painted to match the shutter.

RF

Also available in the **GIULIA REINFORCED** version, featuring continuous flat bars of anti-twist steel inserted inside the slats, designed to counter break-in attempts.

● Diamond fixed
slat shutters

Luna

Fixed blind oval slats

Shutter with 55 mm fixed blind round slats, set in a special aluminium side containment profile.

Camelia

60 mm rhomboidal slat

Shutter with 60 mm open fixed diamond slats in an inclined position, separated by special painted aluminium spacers.

Piemontese

65 mm rhomboidal slat

Shutter with 65 mm fixed diamond slats in the tilted position, separated by special reinforced nylon spacers.

Storica

90 mm rhomboidal slat

90-mm fixed diamond slat shutter in slanted position, separated by special reinforced nylon spacers.

- Adjustable
slat shutters

Firenze

60 mm rhomboidal slat

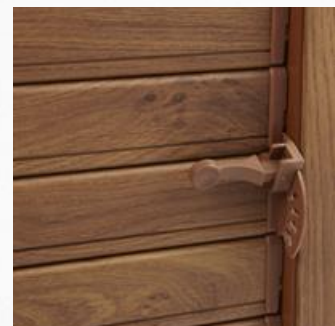

90 mm fixed diamond slat shutter
in slanted position, embellished
with perimeter edging frame and
with possible door insertion.

Aurora

adjustable drop slat

55-mm adjustable drop slat shutter

Also available in the **AURORA
REINFORCED** version, featuring
continuous round anti-twist steel bars
inserted inside the slats, designed to
counter break-in attempts.
CERTIFIED IN CLASS RC2

● Blind
slatted shutters

Alto Adige

Shutter with 125 mm horizontal
blind slats.

Cortina

Shutter with 80 mm vertical slats set
directly into the perimeter frame

Also available in the **CORTINA
REINFORCED** version, featuring special
aluminium slats of approximately 80 mm
with tear-resistant technology, designed
to counter break-in attempts.
CERTIFIED IN CLASS RC2

Nerina

Shutter with vertical slats

Shutter with 85 mm vertical slats set in a perimeter frame with accentuated roundness.

Diamante

Diamond panels

55-mm diamond-framed shutter with the characteristic embossed mirrors in which the blind panels made of insulating material fit perfectly.

● Slatted
shutters

Canazei

Insulated smooth panels

Smooth board shutter formed by a thermal insulation panel set into the perimeter frame of the sash.

Aida

Insulated smooth panels

Exterior smooth-plank shutter formed by thermal-insulation panels and exposed interior perimeter frame.

Scandola

Exterior vertical slats | Interior horizontal slats

Shutter made with 60 mm external vertical slats combined with typical 160 mm internal horizontal shingles.

Also available in **SCANDOLA TT** version, with insulation material that improves the thermal and acoustic performance of the darkness.

Scandola Duo

External and internal horizontal shingles

Fully exposed 160 mm horizontal shingle shutter on both the inside and outside.

Also available in **SCANDOLA DUO TT** version, with insulating material that improves the thermal and acoustic performance of the darkness.

Oscura

Vertical slats

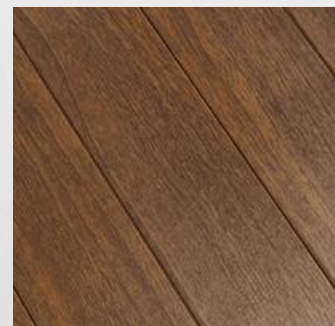

Shutter with the outside formed by 85 mm exposed vertical slats set in an internal structure that forms a perimeter frame.

Oscura Duo

Exterior and interior vertical slats

Shutter characterised by vertical slats with a pitch of about 60 mm in view, both on the inside and outside.

Also available in **OSCURA DUO TT** version, with insulating material that improves the thermal and acoustic performance of the darkness.

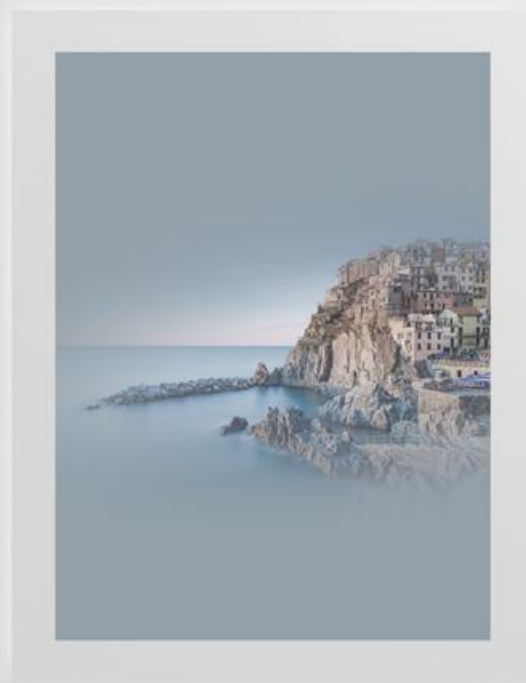

Collection Mediterraneo

Series 36

Mediterraneo is the collection dedicated to areas with a high concentration of salinity that are close to the sea. Strong and durable, the shutters in this collection are enhanced by extruded aluminium fittings and treatments designed to keep the paintwork intact.

The models feature distinctive doors and openings, while the sash thickness is 36 mm.

Ligure

Shutter with 50 mm oval slats and characterised by the typical “Genovese” door opening.

Ventimiglia

Shutter characterised by the side-packing opening.

Collection Triveneto

Series 36

The Triveneto collection includes models and solutions designed to make the types of openings typical of the Veneto, Trentino Alto Adige and Friuli Venezia Giulia regions.

The versatility of the openings and the 36 mm thickness have made this collection highly sought after by lovers of antique lines and thin thicknesses.

● Shutters with slats

Fixed open slat

Shutter with fixed open slat and fixed open 50 mm oval slats, separated by special reinforced nylon spacers.

Fixed closed slat

Shutter with fixed closed slat and fixed oval slats in 55 mm slant position.

● Shutters with slats

Swivelling slat

Shutter with swivelling slat and customizable 55-mm drop slats.

Vertical slats

Vertical slats with choice of 60/70/80 mm pitch that can be interlocked without trimming or carryover profiles.

● Panel

Horizontal slats

Horizontal slats with approximately 120 mm pitch embedded in the perimeter structure of the sash and horizontal sleepers.

Embossed panel

55 mm diamond style embossed panel made from extruded aluminium profiles and smooth interior panels.

- Dimpled panel with fixed closed slat

Blind panel

Smooth panels made with aluminium laminates set inside the perimeter structure of the sashes and sleepers.

Dimpled panel with diamond frame and fixed closed slat.

Also available in a blind panel version.

Triveneto Collection | Series 36

- Dimpled panel with fixed closed slat

Embossed panel with open fixed slat

Diamond-style embossed panel with open fixed slats.

Also available in a blind panel version.

Embossed panel with adjustable slats

Embossed panel with adjustable slats

Also available in a blind panel version.

Collection Minimal

Series 18

The Minimal collection includes the 18-mm-thick packer shutter. This collection was born from the need to make a packable product available with a small volume and multiple design possibilities:

- Small packaging
- Large packaging
- Reverse packaging

Packaged dark with 18-mm-thick aluminium alloy profiles that create a 21-mm-pitch vertical slat pattern when the sashes are closed and open.
